

ELECTRICAL UPDATE

I have spoken with the electricians and they are on track for the inspection. HOWEVER, Duke Energy are saying that due to the work they must complete with the new wiring and the transformer they will NOT be able to re-energize the building until MONDAY morning.

We will be able to use the generator and the elevator over the weekend but the units will not have power until Duke Energy have completed their work. This is scheduled for Monday 27th.

Thankyou

Andrew
